

**BENNINGTON**  
Cooling & Heating

**Since we first started Bennington Cooling & Heating in 1979, our mission has remained constant. Our company provides the equipment, tools and knowledge work force so that we can transfer heat energy from one place to another. Heat transfer is all we do.**

**New machinery, methods, ratings, and codes are continually evolving in the heat transfer industry. We pride ourselves on our tenacity to keep abreast of all of the technologies which affect the Heating, Ventilating, Air Conditioning and Refrigeration (HVAC/R) trade. Our dedication to doing one thing and doing it well has enabled us to evolve into a leading mechanical contractor.**

**Now that we have entered the twenty-first century, wise and prudent energy usage will be increasingly important in our lives. Bennington Cooling & Heating understands energy, and we look forward to the challenges that the future brings. We have and will continue to update our knowledge and skills to take on the demands of more efficient systems and tighter building requirements. The greater Bennington business community will never have to look any further than our company to fulfill any heat transfer needs. Bennington Cooling & Heating has geared up to be your mechanical contractor now and in the years to come.**

**We look forward to working with you!**

# Installations

Cooling comes to most people's minds when they hear the term *air conditioning*. In order to truly condition the air, not only must it be cooled but it must be also heated, humidified, dehumidified and filtered. We have the systems that you need for a total air conditioned environment.

- We are Southern Vermont's exclusive dealer for Frigidaire, a long-recognized name in the residential heating and cooling market. Frigidaire offers

furnaces (oil, gas or electric), condensing units, coils, electronic air cleaners and humidifiers that carry the strongest parts warranty of any manufacture in the residential market.

- Our company installs Sanyo economical ductless split air conditioners. These are the most efficient equipment in their class.
- As a dealer for Trane Commercial air conditioning, we can install your rooftop or split system heating and cooling equipment.
- In our cybernation sheet metal shop, we can make any ductwork for your store, office or factory. Whether your require conventional, exposed spiral or economical fiber glass ductwork, we can fabricate and install it for you.

If your business depends on *refrigeration*, you can depend on our lines of equipment. Completely designed and installed systems are our specialty.

- We can design and construct any size walk-in cooler or freezer to meet your requirements.

- Bennington Cooling & Heating installs Copeland and Tecumseh compressors and condensing units.
- Our company represents the Manitowoc line of ice machines. They offer models in a full range of cube sizes and bin capacities.

# Service

Even the finest equipment can fail if it is not properly maintained. All of our technicians have formal educations in the field from trade schools or colleges. To assure the safe handling of refrigerants, the EPA has certified all of our service personnel. We hold all the licenses necessary to do the different aspects

of the trade in the different states of our service area. We take great pride in our staff of technicians who we dispatch to care for your systems.

Our membership in the Refrigeration Service Engineers Society (the trade's leading educational organization) provides us with opportunities for continuing education which is so vital to our work. Since we represent the best manufacturers of heat transfer equipment, we avail ourselves of the many factory-authorized educational programs that they offer. We have the tools and knowledge to take care of your service needs on a 24/7 basis.

Many times we have found that our customers did not realize the importance of required regular maintenance that heating and cooling equipment needs in order to run optimally. For this reason, we offer service contracts which assure regular preventive inspections and care for your equipment. You will enjoy peace of mind and comfort when your equipment is covered by a service agreement with Bennington Cooling & Heating.

When you need service on your equipment, you need a technician who will be sensitive to your problem. Our courteous and helpful service personnel know that they have our entire organization behind them, helping to solve your technical heat transfer problems.

# About the Company

*Bennington Cooling & Heating is the registered company name of Bennington Refrigeration, Inc. The company is privately owned and is incorporated in the State of Vermont. The president and chief executive officer is Jerry Albert, who founded the company in 1979.*

**Jerry Albert** has been in the refrigeration business for over 40 years. He is a graduate of the United States Army Engineers' Refrigeration School. The Refrigeration Service Engineers Society granted him a Certificate Membership in 1973. He holds an Associate Degree in Industrial Technology from the Community College of Vermont. From 1971 to 1978, he was Vice President of Berkshire Refrigeration, Inc. in Albany, NY.

As a volunteer, Jerry has served as a Director on the Boards of both the Bennington Area Chamber of Commerce and Catamount Access Television Corporation.

**Rich Albert** has been part of the family business since he started as a helper while attending Mount Anthony Union High School. He earned an Associate of Applied Science degree in Air Conditioning and Refrigeration Technology from Hudson Valley Community College in 1994.

During his employment at Bennington Cooling & Heating, he has filled every field position within the company. For many years Rich served in the installation department as one of the Foreman/Project Managers. He is a member of the Refrigeration Service Engineers Society.

In 2004, he was appointed and installed as Executive Vice President of the Corporation.

The perimeter of our logo depicts the four basic components of a refrigeration system. The Bennington Battle Monument is represented in the center.
